PROFILE

Full Stack Developer with **5+ years** of experience at a **product-based company**, building and maintaining features for **KanTime**, a healthcare SaaS platform used by home health and hospice agencies. Strong in **React, Material UI, Node.js, Express and MongoDB**, with hands-on SQL and C# exposure. Outside work, I ship cross-platform apps with **Capacitor, Electron, Expo and Vue.js**, taking products from idea to production.

WORK EXPERIENCE

Software Developer · Full Stack

Aug 2021 – Present

Grasko Solutions Pvt Ltd · Product: KanTime

Bangalore, Karnataka · Product-based company · Healthcare domain

- Build and maintain features for **KanTime**, a healthcare (medical) SaaS product, across the full stack with **React.js, Material UI, Node.js, Express and MongoDB**.
- Develop responsive, reusable UI components with **HTML5, CSS3, JavaScript and MUI**, keeping screens consistent and accessible across modules.
- Design and integrate **REST APIs**; write and optimise **SQL** queries and MongoDB data models for clinical and operational workflows.
- Work on **C#** codebase areas for bug fixes and small enhancements alongside the core JavaScript stack.
- Own features end to end — requirement analysis, development, debugging, code reviews and production support — in an agile product team.

PERSONAL PROJECTS

Rahul Catering Service — App

app.rahulcateringevents.com

Full-stack catering management platform covering the whole workflow: quotation creation, product lists, billing and PDF invoice generation. Ships as a web app, an **Android app (Capacitor)** and a **desktop app (Electron)**.

React | Node.js | Express | MongoDB | Capacitor | Electron

Rahul Catering — Website

rahulcateringevents.com

Customer-facing website with integrated chat and request-for-quotation flow, connected directly to the catering app backend.

React | Vite | Tailwind CSS | Node.js

DiaryByte — Personal Life Organiser

dairybyte.riyazcreations.in

Web + **Android** app I use daily: diary with moods and calendar, passwords, banking details, movie watchlist (TMDB), **autopay reminders** with notifications, expenditure and investment tracking, synced to a Node/MongoDB API. Multi-user login planned. Also built **Vue.js** web apps.

Expo | React Native | Node.js | Express | MongoDB | Vue.js
